PROFESSIONAL SUMMARY

Applied Computing postgraduate and Microsoft Azure AI Certified (AI-900) with seven years of operations experience across Korean Air and a self-founded yoga studio. I work fluently with AI tools to accelerate analysis and automation, while owning every decision so the result is clear to the people who act on it. I turn operational complexity into actionable insight.

SKILLS & COMPETENCIES

Operations & Business: End-to-end business management including scheduling, finances, client relations, and workflow design. Strong understanding of where processes break down in real operational environments.

Customer & Stakeholder Communication: Customer-facing experience across face-to-face, phone, and written channels in English and Korean. Conflict resolution, de-escalation, and cross-cultural communication.

Process Improvement & Automation: Workflow analysis, manual-to-automation transition, data accuracy and record management using Python and SQL.

Agile/SCRUM Delivery: Experienced in sprint planning, daily stand-ups, backlog management, and Git-based version control within a cross-functional team environment.

Languages: Python, SQL, JavaScript, HTML/CSS | **Frameworks & Libraries:** Flask, Bootstrap, Jinja2 |

Databases: MySQL, PostgreSQL | **Tools:** Git, GitHub, Excel, Google Sheets | **Cloud & AI:** Microsoft Azure AI Fundamentals (AI-900), prompt engineering, AI-assisted automation design | **Methodology:** Agile/SCRUM, REST API, process documentation

EDUCATION

MASTER OF APPLIED COMPUTING | Lincoln University **2025 – Nov 2026 (expected)**

- Subjects: Studio Project, Industry Project, Software Development, Database Management, User Experience, Problem Solving and Data Management
- Studio Project: Developed a full-stack predator trap management web application for a real-world client using Flask, PostgreSQL, and Bootstrap, applying Agile/Scrum methodology in a cross-functional team

BACHELOR OF ARTS IN ENGLISH LANGUAGE & LITERATURE | Keimyung University, South Korea **2001**

RELEVANT PROJECTS

Pest Management Web Application **2025**

Lincoln University, Team Project using Agile/SCRUM

- Developed a full-stack Flask/PostgreSQL application replacing manual pest-tracking workflows for regional council operations, translating field staff pain points into role-based digital processes
- Implemented CRUD functionality for trap lines, traps, and operator assignments using role-based access
- Collaborated in a 5-person SCRUM team with sprint planning, daily stand-ups, and Git-based version control
- Delivered edit/update features with form validation and error handling

- Applied responsive design with Jinja2 templates and Bootstrap for a user-friendly interface

Kiwi Market, NZ-Focused Marketplace PWA (Personal Project)

2025

Self-directed full-stack project | hye-park-1166465.github.io/kiwi-market/

- Designed and built a Progressive Web App for a New Zealand-focused marketplace concept
- Created localised product categories and visual identity reflecting NZ market context
- Applied responsive design and modern UI patterns including custom iconography and glassmorphism styling
- Demonstrated end-to-end ownership from concept and design through to deployed live demo

Automation Practice, Python / SQL

2024–2025

- Built scripts to automate repetitive data tasks and process structured data
- Cleaned and transformed datasets for analysis and reporting

PROFESSIONAL EXPERIENCE

International Reservations Representative

2023–2024

Korean Air Customer Service Centre

- Managed customer enquiries and reservations for international routes in a regulated airline environment
- Entered and verified customer data with high accuracy under strict service procedures
- Communicated effectively with diverse international customers in English and Korean, face-to-face and phone
- Experienced a large-scale CRM migration (Equinix to AWS) as a front-line user, maintaining data accuracy and service continuity throughout the transition

Branding Campaign Project Member, Re:Boot Camp 5th Cohort

Sep–Nov 2022

Root Impact × Modulabs (AI/ML Education Institute) | Supported by Fondation Chanel

- Selected for Root Impact’s Re:Boot Camp, a career-transition program for impact-driven professionals
- Contributed to a branding campaign project for Modulabs, one of Korea’s leading AI/ML education institutes
- Gained early exposure to the AI education ecosystem before formal computing studies

Founder & Operations Manager

2018–2022

Yoga Studio, South Korea

- Established and managed all aspects of studio operations including scheduling, finances, marketing, and client relations
- Maintained accurate client records and streamlined internal administrative workflows
- Ensured data consistency and developed systematic processes for daily operations

VOLUNTEERING & COMMUNITY

Referee, FIRST Lego League Christchurch

October 2025

FIRST NZ, Lincoln Events Centre, Christchurch

- Judged robotics competition missions for 20+ teams and 120+ young competitors
- Applied structured rubrics to evaluate team performance under timed conditions
- Contributed to STEM education initiatives supporting youth development in the Canterbury region

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900), February 2026
- Marketing, Advertising, Public Relations & English Studies, M.L.S. International, Bournemouth, UK (British Council Accredited), 2005
