PROFESSIONAL SUMMARY

Master of Applied Computing candidate with experience in business process analysis, data quality awareness, and operational problem-solving. During a Business Analyst internship at Selwyn District Council, developed process documentation standards and worked with stakeholders to improve consistency across business processes. Brings practical experience managing customer and payment records, alongside foundational skills in SQL, Python, and Excel. Seeking to apply analytical thinking, data accuracy, problem-solving and process improvement skills to support reliable reporting and data-driven decision-making.

SKILLS & COMPETENCIES

Analysis & Data : Python, SQL, pandas, Excel, Google Sheets; Power BI fundamentals

Database Applications: PostgreSQL, MySQL and MongoDB, Flask; CRUD, validation and role-based access in a team application.

Business Analysis: Requirements clarification, process taxonomy, documentation standard, naming conventions, stakeholder feedback and process improvement.

Delivery and Tools: Agile/Scrum, Git/GitHub, Flowingly, Microsoft Office

Operations: Customer and payment records, accuracy checks, workflow coordination, user guidance and training materials.

PROFESSIONAL EXPERIENCE

Selwyn District Council Jul 2026 - Oct 2026

Business Analyst Intern | Customer First Programme Christchurch, New Zealand

- Identified inconsistencies in existing process maps and documentation, including naming, classification and required information.
- Developed a practical process mapping framework, including process taxonomy, minimum standards and naming conventions.
- Worked with business analysts and stakeholders to clarify requirements, incorporate feedback and refine the framework.
- Tested framework components in Flowingly and prepared guidance and training materials to support consistent process documentation.

Korean Air 2023–2024

International Reservations (CRM/Reservation Systems) Seoul, South Korea

- Managed reservation data and customer records for 35+ international bookings daily over 12+ months, ensuring data accuracy across global airline systems
- Entered and verified customer data with high accuracy under strict operational standards, supporting consistent service quality across high-volume daily operations
- Experienced a large-scale CRM migration (Equinix to AWS) as a front-line user, maintaining data accuracy and service continuity throughout the transition

Root Impact Modulabs (AI/ML Education Institute) Sep–Nov 2022

Branding campaign project | Re: Boot Camp Seoul, South Korea

- Contributed to a branding campaign for Modulabs (AI/ML Education Institute) and gained early exposure to the AI ecosystem

Yoga Studio 2018–2022

Founder & Operations Manager South Korea

- Founded and operated a yoga studio serving 150+ cumulative members across 4 years, managing 20 weekly classes, 2-3 contracted instructors, finances, marketing, and client relations
- Maintained accurate client and payment records while navigating significant operational disruption during COVID-19, adapting scheduling and member communication processes

EDUCATION

Lincoln University Feb 2025 – Nov 2026 (Expected Graduation)

Master of Applied Computing

- Subjects: Studio Project, Industry Project, Software Development, Database Management, User Experience, Problem Solving and Data Management

Keimyung University, South Korea 2001

Bachelor of Arts in English Language & Literature

Certifications

- Microsoft Certified: Azure AI Fundamentals (AI-900), February 2026
- Marketing, Advertising & Public Relations, M.L.S. International, Bournemouth, UK (British Council Accredited), 2005

ACADEMIC AND INDEPENDENT PROJECTS

Pest Management Web Application 2025

Lincoln University, Team Project using Agile/Scrum

- Developed a Flask/PostgreSQL web application to replace manual predator-trap tracking workflows for a real-world client, translating field staff needs into role-based processes.
- Implemented CRUD functionality for trap lines, traps and operator assignments, with role-based access, form validation and error handling.
- Collaborated in a 5-person Scrum team with sprint planning, daily stand-ups, and Git-based version control

Short-Term Rental Host Decision-Support Tool (New Zealand) 2026 – In Progress

Independent project | Tools: Python, pandas and PostgreSQL

- Imported Inside Airbnb New Zealand data for data cleaning, transformation and neighbourhood-level analysis.
- Aim to develop a decision-support tool that compares similar listings and explains the limitations of the comparisons.

Automation Practice, Python / SQL

- Built scripts to automate repetitive data tasks and process structured data
- Cleaned and transformed datasets for analysis and reporting

2024–2025

VOLUNTEERING & COMMUNITY

Referee, FIRST LEGO League Christchurch October 2025

FIRST NZ, Lincoln Events Centre, Christchurch

- Judged robotics missions for 20+ teams using structured rubrics; contributed to STEM education initiatives in Canterbury

PROFESSIONAL NETWORKS

- **NZ Tech Community:** Canterbury Tech member; participation in DAMA NZ data governance meetups, UXCHCH events and Christchurch developer/data meetups.

INTERESTS

- Yoga & Meditation, Cooking, Reading (psychology)
