PROFESSIONAL SUMMARY

Master of Applied Computing candidate with hands-on experience using Python, SQL and real-world datasets for data cleaning, analysis and decision-support projects. Currently applying data and process analysis in a local government internship, with a strong interest in developing practical data science skills through real-world problems. Microsoft Azure AI Fundamentals (AI-900) certified, with seven years of prior operations experience.

SKILLS & COMPETENCIES

Data Analysis & Programming: Python, pandas, SQL, data cleaning, transformation and analysis

Databases & Development: PostgreSQL, MySQL, MongoDB, Flask, Git/GitHub

Data Visualisation & Tools: Excel, Power BI fundamentals, Google Sheets

Additional Technical Skills: REST API, JavaScript, HTML/CSS, Microsoft Azure AI Fundamentals (AI-900), prompt engineering, AI-assisted automation design

Delivery & Collaboration: Agile/Scrum sprint planning and stand-ups, stakeholder communication, process improvement

EDUCATION

Master of Applied Computing, Lincoln University Feb 2025 – Nov 2026 (expected)

Subjects: Studio Project, Industry Project, Software Development, Database Management, User Experience, Problem Solving and Data Management

Studio Project: Developed a full-stack predator trap management web application for a real-world client using Flask, PostgreSQL, and Bootstrap, applying Agile/Scrum methodology in a cross-functional team

Bachelor of Arts in English Language & Literature, Keimyung University, South Korea 2001

ACADEMIC & INDEPENDENT PROJECTS

Short-Term Rental Host Decision-Support Tool (New Zealand) 2026 – In Progress

Master of Applied Computing, Independent Project

- Building a decision-support tool using Inside Airbnb New Zealand data, applying Python, pandas, and PostgreSQL for data cleaning, transformation, and neighbourhood-level analysis
- Designing multi-attribute similarity and confidence-scoring methods to compare listings and support host decision-making

Pest Management Web Application 2025

Lincoln University, Team Project using Agile/Scrum

- Developed a full-stack Flask/PostgreSQL application replacing manual pest-tracking workflows for regional council operations, translating field data into structured records
- Implemented CRUD functionality and role-based access for trap lines, traps, and operator assignments
- Collaborated in a 5-person Scrum team with sprint planning, daily stand-ups, and Git-based version control

Automation Practice, Python / SQL 2024 – 2025

- Built scripts to automate repetitive data tasks and process structured data
- Cleaned and transformed datasets for analysis and reporting

PROFESSIONAL EXPERIENCE

Selwyn District Council, Customer First Programme (WP2: Process Mapping)

2026 – Present

Applied Computing Intern, Christchurch, New Zealand

- Contributing to process taxonomy, mapping standards and structured process documentation for the Customer First Programme using Flowingly
- Participating in workshops with service managers and team leads to document current-state processes, systems, exceptions and improvement opportunities
- Applying consistent standards across a growing library of validated process maps in a live council environment

Korean Air, International Reservations (CRM/Reservation Systems)

2023 – 2024

Seoul, South Korea

- Managed reservation data and customer records for 35+ international bookings daily over 12+ months, ensuring data accuracy across global airline systems
- Experienced a large-scale CRM migration (Equinix to AWS) as a front-line user, maintaining data accuracy and service continuity throughout the transition
- Developed practical understanding of how CRM data quality affects service continuity, customer experience, and operational decision-making

Branding Campaign Project Member, Re:Boot Camp 5th Cohort

Sep – Nov 2022

Root Impact × Modulabs (AI/ML Education Institute), Seoul, South Korea

- Selected for Root Impact's Re:Boot Camp; contributed to a branding campaign for Modulabs (AI/ML Education Institute) and gained early exposure to the AI ecosystem

Founder & Operations Manager, Yoga Studio

2018 – 2022

South Korea

- Founded and operated a yoga studio serving 150+ cumulative members across 4 years, managing 20 weekly classes and 2–3 contracted instructors
- Maintained client and payment records and adapted scheduling through significant operational disruption during COVID-19

VOLUNTEERING & COMMUNITY

Referee, FIRST LEGO League Christchurch

October 2025

FIRST NZ, Lincoln Events Centre, Christchurch

- Judged robotics missions for 20+ teams using structured rubrics; contributed to STEM education initiatives in Canterbury

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900), February 2026
- Marketing, Advertising, Public Relations & English Studies, M.L.S. International, Bournemouth, UK (British Council Accredited), 2005
